VOLUME VI NUMBER 14 THE GOLD CENTER THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, FEB. 12, 1932

MILL OPERATING AT PROPERTY OF IDAHO-MARYLAND

The large ball mill under installation at the Brunswick plant of the Idaho-Maryland Consolidated Mines at Grass Valley was placed in operation February first and is now delivering finely pulverized ore to the Kraut flotation units. The mill is not running to capacity at this time, but will be gradually worked up to highest production.

The mill receives regrind ore from the stamp mill and passes it on to the recovery process. By its installation the capacity of the plant has been doubled.

The ore crushed is trucked from the Idaho-Maryland shaft, at which place a similar plant is in constant operation.

It is rumored that the Idaho-Maryland Mines Company has taken over the Loma Rica Ranch mineral rights. There are about 500 acres in this property. It adjoins the Brunswick Mines.

There are 160 men employed at both properties.

Mr. Errol MacBoyle is President of the company, and it is due to his courage, and faith in the Idaho-Maryland that it is one of the best paying properties in this section today.

0

EMPRESS MINING SYND. OPERATING NEW MILL

The 10 stamp mill at the Empress Mining Syndicate property at Newtown west of Nevada City started operations last Thursday on rich ore that has been encountered recently on the 400 foot level in the drift. The reduction and recovery plant consists of a 10 stamp crushing battery and latest type flotation installation. It has a capacity of 80 ton daily output.

This property has been operated at different times, but the old methods were not satisfactory in recovering enough gold to make the property pay. It has been found that with the flotation process a high percentage of gold was recovered and the property was put in shape for operation in short time by Mr. Ed Jacobs, manager of the property.

The ledge or vein has developed from a few feet on the surface to about 15 feet at the 400 foot level.

0

DITCHTENDER NORTON CARRIED MILE IN FLUME

Ed Norton, of Nevada City, who is ditchtender for a section of the Cascade Ditch near Quaker Hill escaped death by inches recently when he slipped with his skis and fell into the ditch, which is four feet deep and four feet wide.

It was with a mighty effort that he crawled out of the deep flume, after being carried a mile downstream by the swift current.

He reported conditions at the upper end of the ditch, to the N I D headquarters Monday afternoon.

0

SENATOR SHORTRIDGE IS VERY ILL IN EAST

Senator Samuel Shortridge has been operated on twice in Emergency Hospital here for an intestinal disorder. At this writing the Senator now in his 71st year, is reported as resting easily. He was in the hospital ten days before the operation was performed.

0

Mr. W. P. Clerkin came up from Browns Valley Tuesday to attend the trial, Langley vs. Monroe which was being heard in the local court. In speaking of the snow in the mountains, Mr. Clerkin said, that in 1890 there was 35 feet of snow at the staff right above Graniteville. In the same year patches of snow in August in the same neighborhood, were nine feet deep.

0

Mike Denike of North San Juan was a Nevada City visitor Wednesday.

0

J. Y. Ownby, who has large mining interests near Forest, was a Nevada City visitor this week.

SEEKS STATE TOGA

Assemblyman Jerry Seawell of Roseville, who has announced his candiacy for State Senator at the coming Republican primary election.

SEAWELL TO SEEK TOGA AT AUGUST PRIMARIES

In last week's Nugget appeared the announcementof J. L. "Jerry" Seawell for the office of State Senator at the primary election to be held this fall. He has served the third district as representative in in the last two sessions of the legislature. This district comprises the counties of Placer, Nevada and Sierra.

Jerry Seawell has proved his worth. His fight for the hydraulic mines bill was an epoch in state legislation. Against the heaviest odds he pulled the bill thru not only the Assembly but also the Senate, by the sheer force of his personality. But whether for mining, agriculture or for the general welfare of his people he will again, if elected into this new office he seeks, put up the same hard fight in behalf of his district.

In February 1931 Mr. Seawell introduced 17 bills in addition to some 26 others which covered administrative changes in the various counties in his district and were recommended by the supervisors or grand juries.

He is always seeking information from his constituents that will better conditions in each community in his district.

0

UNWATERING PROGRESSES AT MOHAWK MINE

The crew of men employed at the Mohawk Mine in the southern part of Nevada City, are nearly through retimbering, and are down to the foot wall side of the shaft.

Transformers were installed last week and unwatering is being done as the work progresses.

The Mohawk Mine is down 200 feet and plans are to sink the shaft. The mine is fully equipped with all modern machinery.

Mr. B. L. Eastman is Manager of the property and President of the Company.

Several years ago Mr. Eastman was with the Empire-North Star Mines in Grass Valley, just after graduating from college. He has always had a desire to return to this district and is pleased with his property, which lies in a rich gold producing district.

0

EDITOR IS HOME FROM THE HOSPITAL

Mrs. Elsie P. Willoughby was brought home in the Jefford Ambulance Thursday afternoon after a six week's stay in the Jones Memorial Hospital where she underwent a serious operation.

She is slowly improving.

Her sister Mrs. Elba Meek of San Francisco arrived Thursday evening and will take care of her.

0

MRS. KATE SULLIVAN RETURNS TO FRENCH CORRAL

Clyde Browning of French Corral was a Nevada City visitor Thursday. Mrs. Kate Sullvan, Nugget correspondent, accompanied him home. She has been in Nevada City ever since her fall into the old well at French Corral last winter. Since leaving the sanitarium she has been staying with Mrs. P. H. Flynn.

WILL MCDOUGALL PASSES AWAY IN SACRAMENTO

William McDougall passed away in Sacramento Saturday evening from tuberculosis from which he had suffered a long time. He was born in Garden of Eden, Nova Scotia in 1892.

For a time he worked in the mines in Forest later removing to Downieville where he met and married Miss Ethel Hutchison. They resided in Nevada City for a time, later going to Amador and Mariposa Counties. They then moved to Sacramento where they have lived for the past ten years.

He became an Odd Fellow while residing in Forest, later transferring his membership to Grass Valley Lodge when the two lodges united. Mr. McDougall was highly esteemed by all who knew him.

He is survived by his wife, a son and a daughter, besides two brothers and a sister.

Funeral Services were conducted at the Presbyterian church Monday and the Odd Fellows held grave side services.

0

GRASS VALLEY MINES KEEP MANY EMPLOYED

For the past winter gold mining continued at high pitch in the Grass Valley District with about 1000 men employed at the different properties. As far as payroll goes the peak years of 1914-16 have been restored. In former years when handdrilling and other forms of hand labor were common the number of men were greater.

At the largest property, the Empire-Star, Ltd., operating the consolidated Empire - Pennsylvania-North Star Mines, has been at peak capacity on the basis of the 100 stamp reduction plant. More ore was mined than could be milled but no increase was made in milling capacity.

At the Idaho-Maryland the Company has increased their milling capacity. The Brunswick Mine is being reopened. There are two shafts on the property, one 1200 and the other 1350 feet deep. A notable ledge system is on the property with a heavy past production record at times.

0

ALBERT H. CRAIG PASSES AWAY IN THE NORTH

Word has been received by Mrs. Frank Davies and Mrs. Nell Ferrier of Nevada City that their brother, Albert H. Craig, had passed away in Seattle. The news came as a shock as it was not realized that he was so ill, though in ill health for some time.

Mr. Craig was born in Forest Hill about 62 years ago, leaving that place 30 years ago he settled in the northern city, where he has engaged in the general contracting business. He was held in high regard by all who knew him.

He is survived by a widow, a son a daughter, and the following brothers and sisters Mrs. Frank Davies, Mrs. Nell Ferrier of Nevada City; Robert Craig and Mrs. S. W. Bryant of Forest Hill; Mrs. F. A. Locey, and Mrs. Elizabeth Wilson of Vallejo.

Burial was made in Seattle.

0

STOP AND THINK!

Why is Japan building up such a big navy?

She does not need it to subdue China.

It would be small use to her in a war with Russia.

The chances are remote of her having to war with any of the European naval powers.

Against whom, does it seem probable she is building that great navy?

Having decided in your mind, it might be interesting to speculate as to why she desires the great iron mines of Manchuria, along with its oil, timber and other resources.—Gridley Daily Globe.

0

We hope Sacramento will carry out this suggestion as it will not only help that city, but open a market for many minerals now undeveloped in Northern California.

0

Mrs. P. Armstrong has as guests her niece, Mrs. Alfred Ramsey and husband of Wichita, Kansas.

HOW NEVADA CITY FUNDS ARE DISBURSED

City Clerk George Calanan prepared and submitted to the City Council the following financial statement of the city affairs:

Of interest to the people, will be the item of the swimming pool bond fund, in which there was at the end of the year 1931 the sum of $10,983.65. During the year the city paid off Bond No. 5, amounting to the sum of $1,000, and the coupons attached to the other bonds were redeemed. There remains unpaid of the swimming pool bond the sum of $5,000, and interest. Half of the bonds have been redeemed.

The reports shows the city during the six month period redeemed bonds as follows: Sewer bonds, $700; street improvements bonds $2,000; water bonds $1500; and swimming pool $1,000.

Sewer bond coupons to the amount of $378 were paid; water bond coupons $450; street improvement bond coupons $975.

General Fund revenues for the city were: Taxes $1985.60; water collections $8845.83; licenses $763; Street lights, $25; court fines, $76; miscellaneous, $9.95.

The fire fund received $1888; the library fund $1851.69; sewer fund, $809.22; water bond fund $1472.02 street improvement bond fund $5.-444.60; swimming pool bond fund, $1177.49.

The swimming pool bond fund interest amounted to $199.23.

General fund warrants to the amount of $13,357.62 were paid, leaving the balance in the fund January 1st, 1932, of $1957.09; fire fund warrant $1194.67; balance in fund $693.33. Library fund warrants $808.37; balance in fund, $1043.32.

0

GOLD DISCOVERED IN BOULDER DAM AREA

Ben Bennot is in from the Boulder dam reservation and reports that a discovery has been made by two prospectors in the dam area, the location being up the highway three miles from the Cashman ferry and two miles south, close to the new road, says the Kingman Miner.

The men have been doing some work on the veins, and one of these was sampled by a mining engineer who reported that across nine feet of vein material the assays gave a return of $14 gold.

The discovery of a vein of this magnitude is very important, especially as it will come within the zone of the power development, and cut the cost of operation materially, when power is available through the dam development channels. The men who made the discovery are at work opening the mines, and feel sure that they have one of the most important claims in that territory. —The Mining Review

0

MRS THELMA GAY PASSES IN BERKELEY

Mrs. Thelma Taylor Gay, of Berkeley, daughter of Mr. and Mrs. Ross Taylor of Downieville, passed away from sleeping sickness, the after effects of influenza. She was greatly loved in her home city where she grew to young womanhood. Her parents went to Berkeley about 10 days ago to be with her.

Interment will be made in Downieville, with Holmes Funeral Home of Nevada City in charge of burief services.

0

Word comes from Harry B. Skewes, mining man of Alleghany, that with seven feet of snow on the level and no transportation to and from the community than skis and snowshoes, that many necessities of life remaining. Only first class mail has ben received since the last heavy storm.

0

Mr. and Mrs Gluyas Richards and family of Auburn spent the last week end visiting at the home of Mr. and Mrs. A. Hartung and Mr. and Mrs. W. G. Richards.

0

Ben A. Ballard, of Santa Rosa, who is interested in the Brush Creek Mine near Alleghany was a Nevada City visitor this week.

0

Marshall W. Giselman, musician of Nevada City was a Sacramento visitor recently.

BOSS MINE MAKING STEADY IMPROVEMENTS

A standard gallows frame and shaft collar have been built at the Boss Mine near North San Juan. At present the company is sinking and timbering in the shaft.

All new electrical machinery is to be installed. Two large transformers were delivered to the property last week.

Three loads of poles have been delivered to the property and the tractor is hauling them out along the pole line. The right of way for the pole line has been brushed out eight feet wide and as soon as the poles and wire are up they will cut to a 30 foot width.

About 11 men are employed at the property.

Mr. Charles J. Lyser is superintendent of the Boss Mine.

This property was purchased about a year ago by the Bradley Interests.

0

FINANCIAL REPORT OF NID SHOWS IMPROVEMENT

Manager Mm. Durbrow submitted his financial report of 1931 on the N I D at the first meeting in February, which was held last Friday, in which a moderate improvement was shown over 1930.

Added mining activity added a considerable increase in water sales the total revenue from sales, after refunds being $103,006 as against $96,935 in 1930. Sales under power contracts are not included in the above totals.

A reduction was made in operating expenses, the figures being $26,255 in 1930 to $24,181 in 1931.

About 90 per cent of the bonds of the District have been deposited for refunding.

The board authorized the reopening of the Bowman-Spaulding conduit, now blocked with snow and ice in order to secure as much as possible of the rain fall and water run off from snow, so that it may be stored in the dam.

0

FRED BRADLEY HAS HONOR CONFERRED

The Wm. L. Saunders gold medal for the "outstanding achievement in mining" was presented Thursday to Fred W. Bradley, prominent San Francisco mining man, at a meeting of the American Institute of Mining and Metallurgical Engineers in New York.

The medal was awarded to Mr. Bradley for the success in mining gold profitably from ore containing less than one dollar's worth per ton.

He is president of the Alaska Juneau Gold Mining Company and of the Bunker Hill & Sullivan Mining Company. The splendid gold recovery was made in the Juneau Alaska Mine.

0

PLANE WILL TRY TO DROP PROVISIONS TO CAMP

An attempt will be made to drop several hundred pounds of food supplies from an aeroplane to the 15 men employed by the N. I. D. manager. It is reported Leo Moore of Los Angeles will fly low over the camp and drop the supplies in 50 pound boxes.

The men employed by the district are cleaning the Bowman-Spaulding conduit, near Lake Bowman, of snow.

The snow is from 11 to 15 feet deep on the level and it is hard to walk in with skis without trying to carry supplies in.

Lake Bowman is situated above Graniteville in the high mountains.

0

WORK HALTED ON PLACER CO. ROAD UNIT

Work on the $250,000 highway contract from Gold Run to airport is being halted due to stormy weather, especially the right-of-way clearing which was started a few weeks ago. The Lang Company of Los Angeles has the contract.

When it starts a large crew of men will be employed on the project, which is the last unit of the Colfax-Truckee route.

0

An asbestor ledge was found recently by C. J. Rolph on his ranch below Grass Valley.

NOZZLES TURNED ON BY SIERRA CO. AT FENTON CLAIM

The Sierra Mining Syndicate operating the Fenton claims near Quaker Hill has two nozzles playing a stream of water on the huge bank of earth, boulders and gravel, that they shook up with two heavy blasts about ten days ago. The ditches are running full of water and it is expected this property will soon be making a name for itself. Large boulders are being blasted and removed.

A four horse team, wagon and three men left Nevada City Tuesday morning with supplies for the camp. It took them the most of a day to make the trip.

Seven men are employed at the property, three of them being on the ditch.

W. J. Deegan is superintendent of the Sierra Mining Syndicate.

Mr. Fenton is pleased over the out come of the work. He expects to be back at Camp shortly, as his health is improving over a recent severe operation.

0

CONG. H. ENGLEBRIGHT GETS APPROPRIATION

Representative Harry Englebright made a point of order during debate on the Agricultural Appropriation bill which saved $1,500,000 for use in the state of California to build forest roads. Englebright's brilliant coup was bitterly fought "back stage" by the democratic committee in charge of the bill.

The Californian discovered a phrase which would legislate against the use of $3,000,000 out of the $12,500,000 forest road appropriation. He raised his point of order, not used for many years, against legislation in an appropriation bill. He was sustained by the chair, which made the appropriation available. Of this $3,000,000 increase in usable funds California's share is approximately half.

Following his forceful and clever attack colleagues on the floor of the House staged spontaneous tribute in congratulation.

0

NEVADA CO. RECEIVES $5766 MOTOR FEES

Nevada County will receive $5,-776.67 as its part of the ....6,668,-062.98 in motor vehicle license fees paid by motorists in 1931, under terms of an apportionment announced by the department of motor vehicles. This county's amount was figured on the basis of registration of 3651 vehicles.

Sierra County with 863 vehicles registered will receive $1365.40 in the apportionment.

Half of the total license fees went to the department of public works to be spent on the state highway maintenance program. The other half was divided between counties on the basis of vehicle registration also to be used for highway construction.

0

DEATH VALLEY GOLD MINING CO. SHIPS ORE

The Death Valley Gold Mining Company is preparing to make an initial shipment from the company's property in Yucca Grove, San Bernardino county, California, it is learned. The company has completed the erection of a surface plant, including a small bunk house ,and is now sinking from the surface to the 50-foot level on a quartz vein which ranges from one to four feet in width. Assays of the vein range from a few dollars up to as high as $75 in gold to the ton. The Bonanza Mining Company, a Utah organization, owns a substantial interest in the Death Valley Gold Company, it is said—Mining Review

IS GOLD IMPORTANT

The fear that gold may some day be relegated to the discard has had an influence in maintaining gold at its present height, but the fact that the United States and France are the only countries that have a modicum of gold puts the whole subject of gold into a position that leaves all the countries of the world but two wondering what the outcome will be. Will gold increase in value or will it be discarded as a money metal by the countries not in the gold standard ring, is now the problem that is imposing itself on them all.

Memories are short, comments the Chase Economic Bulletin. Startled inquiries have come since, England, Sweden, Japan and some other countries abandoned the gold standard, as to what will happen to gold and the value of gold when only a few countries adhere to the gold standard. Fear is expressed that the countries which abandoned the gold standard will have an immense advantage in foreign trade over the countries which adhere to the gold standard.—Western Mining World.

FROM OUR READERS

May I have space in your valued paper to express my opinion on a subject that should be of great importance to Nevada City taxpayers

As a newcomer and property owner in your midst I can not understand the delay in building your swimming pool.

I am going to suggest a way out for the "City Dads" if they don't care to take the responsibility of selecting a site. Why not select a half dozen sites and estimates of cost and place the subject on the ballot in the primaries so that the people could choose their own location by a majority of votes cast on some one site.

This city will be a summer resort in the course of time and your swimming pool will only hasten the day. It will be only a matter of time until an auto camp or two will be started in the outskirts of town and other people will start erecting cottages. The house shortage is very acute here at present. A new home not completed has had an attractive offer to rent. So far we have had a fine patronage of the Ski Course this season.

Why not get the swimming pool in order at once and draw more people to this beautiful spot. It is such a short trip over excellent roads, from the warm Sacramento Valley that it would be a treat to spend a vacation up among the pines, refreshing air, and such a lovely place with only a short trip.

Many of our local people go elsewhere to enjoy swimming.

Select a committee of your progressive citizens to choose sites with plenty of parking space for autos and ones easy of access.

Nevada City taxpayers are retiring the bonds and have signified at two elections that they want the swimming pool. What could be more convincing?

A Nugget Reader.

FEDERAL INCOME TAXPAYERS

"For the convenience of those who are required by law to file federal income tax returns, Deputy Collector Charles Dapper, of the Internal Revenue Service, will be at the "Morning Union Office" on February 19th to assist taxpayers in preparing their returns. No charge will be made for this service. The matter of filing your income tax return should be given immediate attention in order to avoid penalty and interest."

JOHN P. M. McLAUGHLIN.
Collector.

WHAT IS THE CAUSE OF YOUR COUGH

Many people do not realize that coughing is the efforts to loosen phlegm from the infected spot in order that it may heal.

That is the function of Rexall Cherry Bark Cough Syrup. It loosens the hard, dry phlegm—soothes the tickling and heals the inflamed tissues. In a very short while your cough has entirely disappeared. Get a bottle at the Rexall Store today. You will like its pleasant taste.

R. E. HARRIS
THE REXALL DRUG STORE

THIRTEENTH ARTICLE BY DR CRONWELL

Article thirteen of a series of health articles written by Dr. B. G. Cronwell, chiropractor and food scientist, formerly of San Francisco now temporarily located in Nevada City, California.

Some people are very superstitious about the number thirteen. The writer was born on Friday and the thirteenth day of the month and has always found Friday and the number thirteen to be exceptionally good for him. This being article thirteen it should be one of my best.

We should be more interested in the proper selection of foods which will keep our bodies in the best shape that we may be able to enjoy every minute which we are permitted to remain on this earth. To do this you must start right in and make the care of your body your big business.

If you use tobacco try to use it in moderation If you use alcoholic beverages do not let the habit grow on you until you cannot govern yourself. Always know when you have had enough and do not let any one persuade you to take more. Always be master of your own soul It is also very wrong to be a heavy drinker of tea and coffee which are both powerful nerve stimulants and the more you use the more you want.

Of the three the only reason that the use of alcohol is considered to be the greatest wrong by some people is because the over use of it, will cause that person to loose his senses and do himself or some other person harm and under the influence of too much alcohol can not perform his work to provide his livelyhood. The writer does not care for hard liquors and knows for him it is not good, but there is here and there a man that three or four drinks of strong whiskey a day is just what he needs and has to have to be at his best. Some of our very best mechanics could not turn out a piece of work which would hold their job when not pepped up to the point of their greatest proficiency.

Some men without three or four glasses of strong whiskey daily would not have nerve enough to go and ask for a job. they could not demand the pay they know they are rightfully entitled to, or do the work when they had it. This does not apply to just the common worker if you please, some of our greatest surgeons who do not use the hypodermic needle on themselves always have their six to ten glasses of high proof whiskey to steady their nerves before performing a major operation and it is absolutely necessary as they must be steady, one little shake of the hand holding a sharp knife might do any amount of damage, at a critical moment. When the practice of medicine first began to die out and doctors had to turn to surgery to exist, a good many doctors retired from their private practices, knowing that their nerves were not steady enough without resorting to some powerful stimulant which they knew in time would wreck their own life. The writer while attending the horse races last fall saw a trainer give a horse twenty aspirin tablets just as they were about to lead him out of the paddock. That was to stimulate him and cause him to over step him self and be calm at the wire. The horse won the race and was not considered a favorite. Thousands of people today are getting their stimulation from candy eating. Keep candy away from them for twenty four hours and they are shaking so they cannot carry a full glass of water across the room. In caring for chronic cases I always make many changes in the diet which I find that person has been living on for several years.

A great many of those foods were heavy rich stimulating foods and as soon as they are taken away the patient finds themselves in a very weak nervous state, which is their true state. Now they know just how sick they really are and how necessary it is that they lose no time in doing all they can to build up a strong body. I teach them and they soon learn that the foods best for them are the cheapest and the big saving they make in the purchase of foods, the first year will more than pay their doctor bill and from then on they will have no doctor bills. To avoid some kind of a sick spell this spring, now is the time to see that your diet consists of plenty of ranges, lemons, grapefruit, apples, fresh pineapples, lettuce, celery and spinach. All in the natural raw state. The Big Book says the blind were made to see and I believe only when the stomach is given the right kind of food, the mind becomes keen and you are able to see the wonderful opportunitities to make your life a pleasure. Could anything be more beautiful than to know that you were living so that you would never again in this life have a sick day? day? I am askng you?

The writer has so lived the past nine years and has taught a great many others to know what is food and what is not. How wonderful it is to know that ill health will not be my excuse for not attending the world's fair at Chicago next year. How many times you hear some one say, well if I have my health next year I am going to take a nice trip, with the car and take the family along if the wife and children are not sick. Seems to me that this condition called sickness is the one big mill stone around most every ones neck. My what an unnecessary handicap, when it is possible for every one to learn how to select correct foods. To learn, one must first have the desire and be ready to except and learn. They must be glad when they learn that the one thing which they liked best is their worst enemy. If you have the most of your teeth and they have no cavities, why not change your diet so you will have those teeth the rest of your life and so you can truthfully say your teeth have never given you a minutes trouble. You can not expect to have your teeth twenty years from now if you are going to continue filling your stomach with useless trash just because they taste good. Robbing your blood stream day after day soon shows up in the failure of the teeth, skin, hair and mucles.

G. O. P. CHAIRMAN URGES VOTERS TO REGISTER EARLY

The urgency for voters to register under the new permanent registration law was emphasized by Mark L. Requa, Republican National Committeeman for California. The old registration system has been discarded, and beginning January 1, all voters must re-register and, once having done so, they remain permanently on the great register unless failing to vote at either the August primary or the November elections.

March 24 is the last day on which voters can register or transfer their registrations or change their party affiliations, in order to participate in the May Presidential primary.

"It is highly important that everybody eligible to vote make certain that they are on the new register," said Requa. "Furthermore in order to participate in the presidential primary it is necessary to be registered as a Republican. Otherwise, when one goes to vote, he or she will not be given a ballot on which appears the names of the delegates to the Republican national convention at Chicago. A person registering as a Democrat or declining to state one's party affiliation is, in other words, deprived of the very important privilege of voting for Republican delegates."

Many voters who at first registered as other than Republicans are now changing their party affiliations back to the G. O. P., Requa reports.

Republican leaders further point out that registering under this banner places greater value on one's vote at the August primary, where a candidate for United States senator is to be selected as well as a set of legislative officers. Practically all major contests are within the Republican party.

Requa who is actively engaged in the campaign to secure a solid Hoover delegation to Chicago, summarizes a program which he says merits the whole-hearted support of all citizens:

"President Hoover has appealed to Congress to enact legislation designed to break the vicious spirals of deflation that continuously generate further deflation. The program includes seven projects: Strengthening the land banks: creation of the Reconstruction Finance Corporation; enlargement of Federal Reserve Bank powers; early distributions to depositors in closed banks; revision of laws to help railroads; revision of bank laws to safeguard depositors; economy in Federal expenditures."

FREQUENT ADJUSTMENT OF HEADLIGHTS URGED

SACRAMENTO, Feb. 11—Results of 20 days special enforcement aimed at illegal headlights made public by the California Highway Patrol show 37,661 citations were issued for the period.

The work was statewide in character including not only the regular county squads but special squads as well. It was done under the general direction of E. Raymond Cato, chief of the patrol.

The mass of citation were issued to persons driving with glaring headlights or with only one light, these offenses taking up 26,053 of the total.

For especially flagrant violations arrest citations were issued. In a great number of cases, however, the warning or non-arrest card was issued which relieved the motorists of appearing in court whenever, after having been stopped, he had had his lights adjusted and had reported back to the patrol.

Commenting on the results, Chief Cato declared conclusive proof had been discovered of the advantages of frequent voluntary check-ups by the motorist of his lights. He said:

"Motorists who make a practice of having their lights adjusted frequently are seldom ever stopped by our officers.

"Only a small percentage of those stopped were able to show they had ever had any adjustments made to their headlights.

"Knowing this, it may be our policy in future to give warning cards to those who are able to produce certificates of adjustment, and arrest citations to those who do not have such certificates.

"The car owner has only to give a little attention to his lights to give him adequate and safe illumination on the highways."

BULLETIN TELLS MINING COSTS IN JARBIDGE FIELD

The mining of gold-silver ore at the Elkoro mines at Jarbidge, Nevada, is described in a report just published by the United States Bureau of Mines, Department of Commerce. This is the principal operation at Jarbidge, Nevada, a remote district, which is nevertheless one of the principal gold producing centers of the state.

The gold and silver occur in quartz veins dipping steeply into a thick series of Tertiary lava flows. Prospecting and exploration are rendered difficult by a covering of surface wash over much of the area and by the extensive faulting of the rhyolite flows, only a relatively small vertical section of which appear to have favored with ore deposits of economic importance. Mining conditions are favorable, as the ground stands well enough to permit shrinkage stoping, and the rugged topography of the country has favored the development of the ore zone by adits. In the year 1930, for which costs are given, all the production was from shrinkage stopes, although cut-and-fill methods have been used in the past and will be used again in areas where cross-faulting has weakened the vein walls.

A drainage problem connected with the recent development of an ore body lying below the bottom adit was solved by the installation of a deep-well type centrifugal pumping plant.

Ore is transported by hand or mule tramming on some of the stoping levels, and by electric locomotive haulage on two main levels. The lower of these levels is at the elevation of the mill. From the adit of the upper level the ore is transported 1200 feet to the mill by aerial tramway.

Mining costs, excluding development, are given in considerable detail, and amount to $2.61 per ton. Development costs are $11.33 per foot for drifting, $10.30 for raising, and $23.82 for winzes. The cost of aerial tramway transportation is given at 13½ cents per ton. The problem of bringing supplies in from the railway at Rogerson, Idaho, has been chiefly one of road making. Improvement in the road has gradually reduced the cost of this service from 2 cents to slightly less than 1 cent per pound for the 70-mile truck haul.

These operations are described in detail in U. S. Bureau of Mines Information Circular 6543, "Mining Practices, Methods and Costs at Elkoro Mines, Jarbidge, Nevada," by John Furness Park, mine superintendent of the Elkoro Mines Co., and one of the consulting engineers of the U. S. Bureau of Mines.

FUNDS FOR WAR ON PINE BEETLE ARE DEMANDED

Congressman Englebright, who has the largest portion of the beautiful California timber in his district, spent a lot of time last season securing allowances for this protection.

The following has come to our notice:

Indignant over failure of the agriculture department appropriation bill, pending in the house, to carry a specific allotment of funds to combat the pine bark beetle menace, California's delegation in congress swung into action.

The bill carries a lump sum of $7,092,994 for protection and administration of the national forests. Representative Harry L. Englebright of California said this sum is to be spent for various activities of the forest service and there is no assurance that any will be spent for suppressing the pine bark beetle.

After conferring with officials of the forest service, Englebright said that the sum allotted in the bill would cover only current projects or "fixed" charges, and not be sufficient to permit an outlay of pine bark beetle warfare.

With leaders in charge of the agriculture department bill militantly against inclusion of any items to increase the appropriation, Englebright indicated the strategy of his forces probably would be to make a fight for specific allotment in the senate when the bill is before that body.

Englebright said:

"There will be tremendous loss in the timber lands of California this year, due to the ravages of the pine bark beetle. Whether conditions last year were conducive to a great increase in this pest. Oregon also will be hard hit.

"The annual loss from the pine bark beetle in California is around $15,000,000 in timber, which would mean a loss of $27,000,000 in lumber at mill prices. This year the loss will be much greater.

"Expenditures of $100,000 or $200,000 for combating the beetle would be repaid many times in the value of timber saved."

THE PLAN FOR THE GREATEST POSSIBLE ULTIMATE ECONOMIC DEVELOPMENT OF THE WATERS OF THE BEAR RIVER WATERSHED, PLACER AND NEVADA COUNTIES, CALIFORNIA, IN CONNECTION WITH FOREIGN WATERS NOW DIVERTED THEREINTO, AND OTHER FOREIGN WATERS WHICH CAN BE THUS DIVERTED

(By J. L. ROLLINS)

The greatest human need in California is water. The cycle of years of subnormal rainfall is extended, and the demand and necessities for water are multiplied within the last decade. The fake rainmaker who leached sustenance from the credulous has sequestered himself and is no more in evidence.

Federal and state engineers and commissions are now jointly looking to the snow upon our mountains, our "frozen assets", congealed vapors from the sea, as a perpetual source of water supply by constructing dams and reservoirs in our mountain rivers and canyons with water conduits therefrom in the utilization of our "frozen assets" as they shall become "liquidated" in perpetuity neath the summer sun.

For local, sectional and statewide projects for the conservation of water in Califrnia, there will be expended additional hundreds of millions of dollars. There is no substitute for water.

At the convention of the Association f Western State Engineers, recently held in the city of Sacramento to, a dominant thought accentuated the co-ordination of the beneficial uses of water and co-operation in their development and conservation.

It is conceded that there are beneficial uses of water and harmful uses of water. Where such vast sums of money are involved, and also in smaller expenditures, it is the part of wisdom and good judgment to secure the beneficial uses of water at the lowest just and reasonable cost, and not to make any development that would prevent a beneficial use of water, such as the economic storage of water, and more particularly when the storage of water would result in an increase of all beneficial uses of available water. Insofar as practicable, all beneficial uses of water should be safeguarded and utilized and not be returned, unremunerative, back to the sea.

The time required in a large and comprehensive development of the waters of California is an important factor. The necessities of water for a rapidly increasing population and expanding industries, including agriculture and commerce, make the development and conservation of water mandatory. The necessity for large additional water development should be anticipated and made economically available for the people.

In full accord with the foregoing principles relative to the development, conservation and utilization of the waters of the state of California, the writer has devoted much time and investigation to the waters available for the Bear River watershed.

Each of three corporations proposes a different development of the waters of Bear River.

The Pacific Gas and Electric Company has an application before the State Water Commission to build Drum No. 3 Power Plant on Bear River above proposed Rollins Dam and on the floor of the proposed Rollins reservoir. There would be no storage of Bear River waters.

The Bear River Water and Power Company has an application before the State Water Commission to store Bear River waters in the Rollin Reservoir that would cover Drum No. 3 Power Plant nearly 200 feet deep with water and be available for all beneficial uses of available water. It would add some 94 feet in maximum head to the foreign waters of the Pacific Gas and Electric Company now diverted into Bear River, and likewise some 94 feet in maximum head to the foreign waters of the N. I. D. now diverted into Bear River and under lease to the Pacific Gas and Electric Company.

Other waters of adjacent watersheds can be diverted into Bear River basin. Likewise, these waters would have an additional maximum head of some 94 feet.

The laws of Nature forbid two objects occupying the same space at the same time.

The Nevada Irrigation District has an application before the State Water Commission to store Bear River waters in the proposed Parker Reservoir, below Rollins Reservoir, which include Bear River waters proposed to be stored in the Rollins Reservoir, and not available for power or irrigation to a time "too remote to be considered". The Parker Reservoir is not an economic possibility.

The laws of Nature forbid that one object can occupy two places at the same time.

It is thus seen that the Bear River Water and Power Company is betwixt and between the Pacific Gas and the District; between the uppor and lower millstones; between the Devil and the Deep Sea, to use figures of speech.

But what would become of the "grist" between the upper millstones of the Pacific Gas and the nether millstones of the N. I. D? The "grist", the unstored and uncontrolled Bear River water, would perennially slip away to the sea unutilized.

It is noted that there is no conflict or interference in the proposed development by the Pacific Gas and the N. I. D. They would both work in harmony for the prevention of the storage of the Bear River waters and all beneficial uses therefrom, while the Bear River Water and Power Company would provide for the greatest beneficial uses of all waters involved and of great values to all interested parties. Mutual benefits would inhere therein.

To be Continued)

Dan D. Breuning, superintendent of state highways in this district is home after several months of convalescing in San Francisco from an operation for stomach disorders. He is greatly improved in health.

YOUR OPPORTUNITY

AUTOMATIC Gas Water Heaters now cost 50% less than in 1917... Economical to operate

Terms as low as $4.85 down, $3.85 a month.

HERE is the greatest bargain, the greatest value in Automatic Gas Heaters! You can buy one for 50% LESS than you could in 1917. For a limited time, we are offering terms as low as $4.85 down and $3.85 a month, with a liberal trade-in allowance for your old non-automatic water heater or water-back.

Automatic water heating costs less per gallon than any other method of heating water in the home.

Plenty of Automatic Hot Water dissolves dirt 2 to 20 times faster. That saves your *energy* with the clothes, dishes, and all your other household cleaning tasks.

With an Automatic Heater you do not wait for water to heat. You save *time*. Studies have been made which show that an Automatic Gas Water Heater saves 4 to 6 hours each week. These hours are yours for reading, shopping, or entertaining.

Instant hot water soothes your nerves when you come home dusty and tired. It is a blessing to have a basinful or a tubful of hot water any time of the day or night. Just turn the faucet.

The Automatic Gas Water Heater puts a self-starter on your hot water service. It heats the water, stores it in its tank and shuts itself off. No gas is wasted keeping the water hot because the tank is insulated. Architects and builders are specifying automatics for all homes. When you select an Automatic you are not buying a luxury but making an investment in one of the most important necessities for healthful, happy home life.

NEVADA EXHIBIT AT STATE FAIR IS AGAIN EXPECTED

SACRAMENTO, Feb. 11—Nevada county's exhibit at the California State Fair each year constitutes one of the best advertising features available to the county in presenting a direct message concerning the superiority of products, resources, and opportunities of the area, in the opinion of Charles W. Paine, secretary-manager of the fair.

"Nevada county deserves much praise for the splendid exhibits which have been placed in the State Fair for a number of years," said Paine. "The Nevada county exhibit at the 1931 State Fair attracted wide attention and much favorable comment from the thousands of visitors. These visitors came from all parts of the nation and from many foreign countries. The county exhibit is of definite benefit in extending markets, widening the distribution of products and focusing attention on the area represented."

At the 1931 State Fair Nevada county gained attention through awards in apples, pears, plums and prunes and minerals. In addition the county was awarded a silver cup for completeness and excellence of its exhibit.

The directors of the State Fair are looking forward to Nevada county's participation in the 1932 State Fair, September 3 to 10.

NEW PRODUCTION RECORD MADE BY CALAVERAS MINE

SAN ANDREAS, Feb. 11—Gold production of the Calaveras Central drift placer mine, near Angels Comp, during Jonuary surpassed all previous monthly records. Such is the announcement of Harry Sears, president and manager. He made public no figures, but explained that to the management the showing was the more significant in that the gold recovery equipment actually operated only 21 days, the remaining ten days of the month being used by the underground crew in enlarging the station at the bottom of the 350-foot three-compartment vertical working shaft and laying 20-pound mine ralis in all tributary workings. The daily average of gold-bearing gravel washed during the 21 days was 72 tons, in addition to which a daily average of 30 tons of bedrock waste rock was hoisted. Beginning February 1 daily operations were increased from a two to three eight-hour shift basis and the mine crew enlarged to a total of 33 men, Mr. Sears states. In consequence, he calculated the gravel production during the current month should average around 150 tons daily.

By outright cash purchase, George R. Wooding of Boston has acquired from Frederick S. Duncan of New York City the Keystone lode mine, embracing 97 acres and adjoining on the south the well-known Petticoat mine near Railroad Flat. The new owner has arranged witn Joseph E. King, San Andreas mine operator, to put a force of miners to work on the property as soon as weather conditions permit.

Under a lease and bond from the Taylor Estate of Railroad Flat, Fred M. Hughes and Los Angeles associates have taken over the Wolverine lode mine, five miles east of Glencoe, which prior to 1872, when it closd down, was developed to a depth of 360 feet. Under the supervision of Frank Garbarini of Mokelumne Hill, preparations are being made to unwater the shaft and inaugurate diamond drilling operations, it is asserted.

BORDER CHECKERS TAKEN FROM HIGHWAY PATROL

SACRAMENTO, Feb. 11—Operator examiners and border checkers will hereafter operate under the Division of Registration, Department of Motor Vehicles, instead of the California Highway Patrol.

This joint announcement has been made by E. Raymond Cato, chief of the patrol, and Russell Bevans, motor vehicle registrar. The transfer is being made for reasons of efficiency and is part of the general plan of reorganization adopted some time ago.

Mrs. E. W. Schmidt is spending a couple of weeks visiting with her daughter, Miss Mary Schmidt, in San Francisco.

CHICAGO EXPOSITION WILL OPEN SURELY IN JUNE 1933

CHICAGO, Feb. 11—Rumors that the 1933 World's Fair—a Century of Progress—would be postponed were definitely spiked here by President Rufus C. Dawes in an address before the influential Hamilton Club.

The exposition will surely open June 1, 1933, Mr. Dawes asserted.

"We are making excellent progress in securing the promise of participation of foreign nations and different states of the union and have secured as many assurances of support as have ever been the case with other expositions so long before the gnounced date of opening," Mr. Dawes declared.

Mr. Dawes disclosed that postponement for a single year would cost the exposition at least $1,200,000 without any compensating advantage.

"One important item is that we have already made contracts with important corporations for the erection of buildings and the purchase of space in the aggregate sum of about $3,000,000," he said.

"These contracts are binding upon the corporations. In most cases the consideration has actually been paid in advance. These contracts, equally binding upon us, call for the opening of the fair on June 1, 1933."

SAFETY ON HIGHWAYS

Safety in walking on highways or on strets and roads where there are no sidewalks lies in keeping as far as posible to the left, thereby facing approaching traffic. This is the subject of the February safety poster lesson distributed by the Public Safety Department of the California State Automobile Association for use in 13,500 classrooms of northern and central California.

The poster depicts a boy and girl, evidently on they way to or from a a rural school, walking under an umbrella on the left side of the highway. The umbrella emphasizes the danger they would risk were they walking on the other side of the highway with traffic approaching from the rear. Lesson material provided for the use of teachers gives the following comment on the theme of the poster:

"In walking upon the left-hand side of highways you are able to see all vehicles coming toward you It is safer because you can step out of danger in time to avoid being struck if the driver does not see you because of a turn in the road, or a hill, or because his vision has been momentarily attracted to other objects.

"It is certainly easier to look ahead than to look back over your shoulder, which you must do in walking upon the right-hand side of highways.

"It is often necessary to walk near the edge of the pavement due to poor condition of the shoulder along the road. If one were carrying an umbrella and at the same time walking on the right-hand side of the highway, it would be very difficult to look back."

The lesson cites the fact that walking on the right along a highway is not only dangerous but is a misdemeanor under the state law.

HUGE ROAD TAX IS PAID BY GREYHOUND STAGES

The highway fund of the State of California was this week benefited by $124,875.88 represented by a tax payment of Pacific Greyhound Lines.

This sum is the first semi-annual payment of the 4¼ per cen of gross receipts of the bus company due in 1932.

Pacific Greyhound Lines, in addition to the 3 cents per gallon gasoline tax, is in common with other public utilities in California, assessed 4¼ percent of gross receipts in lieu of property or other taxes.

Provisions of the state law require that the gross receipts tax from bus companies be allocated to the various counties, in which the bus company operates, to be used for highway maintenance purposes.

The gasoline tax from bus cmpanies is allocated to the general highway fund.

A CORRECTION

Through an error the names of Mrs. Charles Elliott of Nevada City and Mr. Carl Tamblyn of Grass Valley were left out in our mention of those taking part in the Methodist Musicale given last Thursday evening.

TWO ARBOR DAYS TO BE OBSERVED DURING YEAR 1932

SAN FRANCISCO, Feb. 11—California will celebrate two Arbor Days this year, according to plans announced here by the Outdoor Christmas Tree Association of California.

The first Arbor Day will take place on February 22, as a part of memoration of the 200th anniversary of the birthday of George Washington, while a second Arbor Day will be the customary one, set by the State Legislature for March 7, Luther Burbank's birthday, which has for the last three years been observed throughout Californi been observed throughout California under the direction of the Outdoor Christmas Tree Association.

Through Clarence F. Pratt, president of the association, an appeal is being made to all garden clubs, parent-teacher groups, and other organizations to participate in one or both of the Arbor Day fetes by planting living Christmas trees suitable for outdoor decoration in future years. This program will tie in with the national appeal of the American Tree Association to plant 10,000,000 trees in honor of George Washington during 1932.

"Celebrations and pageants, however elaborate are soon forgotten," said Pratt,, "but the tree is an enduring monument. Therefore the Outdoor Christmas Tree Association is advocating the planting of living Christmas trees on February 22, in honor of Washington, and on March 7, in honor of Luther Burbank, that we may have these growing symbols to remind us of these great men."

SINKING ON ROYAL GROUP MINES SHOWS GOOD ORE

JAMESTOWN, Cal., Jan.30.—The Fox Mining Company, composed of J. J. Merrill and Los Angeles and Sonora associates, is sinking an incline two-compartment shaft on its Royal group of five claims, comprising 100 acres, three miles west of Jamestown. The bore has gained a depth of 50 feet on a vein which shows a width varying from one and a half feet at the surface to four feet in the shaft bottom. Recent assays of ore exposed in the bottom of the workings gave an average of $60 a ton in gold, according to Mr. Merrill.

NOTICE TO CONTRACTORS

Sealed Bids will be received by the City Council for the following named materials, bids to be opened on Monday, February 15th at Eight o'clock P. M. at the City Hall on Broad Street.

Item 1— 1,000 Linear feet more or less 10 inch double rivited steel, No. 12 gauge, soil proof, wrapped, double dipped, slip joint pipe.

Item 2— 1,000 Linear feet more or less cast iron pipe 70 to 75 pounds weight per linear foot.

Item 3— 1-10 inch Flanged Valve tested to stand 125 pounds pressure with pair flanges drilled to match and bored to fit above 10 inch steel pipe.

Item 4— 1-10 inch Standard Water Works Valve for cast iron pipe tested to 125 pounds pressure. All material to be delivered at Nevada Co .N. G. R. R. Depot.

Item 5— Construction of Fire Proof Reinforced Concrete Vault. Doors to be furnished by the City. Contractor to install said Door inside dimenisons of said vault to be 6 ft. 6 in. wide—10 feet long and 8 feet high,— to be constructed in accordance with plans on file at the City Hall.

Board reserves the right to reject any and all bids.

R. J. BENNETTS,
Mayor.
GEO. H. CALANAN,
City Clerk.

30-FOOT VEIN OF $50 ORE EXPOSED IN SONORA MINE

SONORA, Feb. 11—Thirty feet of vein matter, including several quartz segments measuring a foot or more in width and assaying more than $50 a ton in gold, it is asserted, has been exposed by a cross-cut being extending from the face of a 340-foot drift tunnel on the Consuelio section of the Providence mine near Tuolumne, being operated by Kin. Crowley of Oakland and associates. The tunnel is being advanced to tap the downward extension of what is known as the Mexican winze crebody, which yielded rich ore in surface operations on the property about 20 years ago. Conditions prevailing in the tunnel and crosscut indicate that the goal of current development work should soon be gained. The present face of the tunnel gives a vertical depth of 300 feet on the vein, it is stated.

B. A. Whittaker and George Connally of Tuolumne have resumed development work on their Paragon mine, nine miles southeast of that town, after a suspension of several months due to adverse weather conditions. The force of miners employed there is extending a tunnel, at present 100 feet in length, to intersect an orebody which on the surface shows a width of two feet and assays $100 a ton in gold, it is stated.

Dr. William Green and Emory Gates of Modesto have acquired under lease and bond from Herbert Shaw and John Brett of Sonora the River Bend lode property on the Tuolumne River near Groveland. A force of eight men has been put to work building a 25-ton roll mill, bunkhouse and other necessary buildings preliminary to the further extension of two tunnels, measuring 85 and 100 feet in length.

BASKETBALL TEAMS ARE READY TO PLAY

Traditional rivals meet tonight in what promises to be some real basketball when the three fives from the local high school meet rival teams from Grass Valley. Grass Valley took two games from Nevada City last Friday night winning the A game by a score of 15 to nine and the C game by a score of 23 to eight. The only Nevada victory went to the B team by a 10 to 9 score.

The local C team is not given much chance to win tonight but they are capable of better basketball than they played last week. The B team is favored to win tonight even though the score was so close last week. The local team had a poor night and even the most ardent Grass Valleyan admitted that the Grass Valley Bs had played away over their heads. With a little luck the local A team should have a good chance of winning tonight.

Since the U. S. California used the stalling system of basketball with so much success it has been used considerably by other basketball teams. Grass Valley uses this system of basketball and while it isn't spectacular to watch it gets results. Their A team victory was gained thru this new system so it can be expected again this week. Despite the use of this system the locals think they can take the Grass Valley boy's measure.

The games will be played at the Grass Valley Gym and will start at seven o'clock. The admission will be fifty cents and basketball fans can expect their moneys worth when Nevada City and Grass Valley meet.

Next Thursday night the Nevada City Blues will start plans for the coming baseball season. A meeting has been called for next Thursday night at the Foresters Hall. Means of raising money for the coming year will be one of the most important affairs to come before this meeting. Whether the Blues play league baseball or not will come up for consideration. If the Blues can raise enough money they hope to get in some league this year. Election of officers and appointment of a manager for the coming season will also come up before this very important meeting.

In last week's article due to an error no mention was made of Caremon Larsen and Bob Polglase the two utility men of the Blues. These two players have filled in at varius positions and have been two of the most faithful players of the team. The team has lost a valuable player in Ed Davey first string catcher of the Blues. Ed had the misfortune of losing a thumb since last baseball season and this will keep him out of baseball this year. Ed has been a valuable asset to the Blues and will be missed this coming year.

GOLD PRODUCTION FOR 1931 SHOWS DECREASE

Mineral products in California during the year just closed showed a decided increase in value, according to a report just issued by Walter W. Bradley ,state mineralogist. The total of all products is conservatively estimated at $220,290,000. Of this petroleum leads the list with a value of over $14,000,000, and natural gas comes second with $20,350,000. Crushed rock and gravel comes third with a valuation of $13,140,000 and gold is in fourth place, its total valuation being $10,-708,000. The total production of mineral products is shown to have been a decrease in some lines, but there is encouragement for gold that that commodity's value was increased by more than a million and a quarter dollars.

Mines of the Mother Lode district the report goes on to state, are responsible for much of the increase in the yellow metal. Placer properties also are given credit for a portion of the gain. Dredgers showed little change from the previous year, however.

0

In this day it is necessary to have a cash balance to be weighed in the social scale.

0

Of course htere are crooks in politics, but no profession is denied its share.

FOR THE CALIFORNIA DEBRIS COMMISSION

The California Debris Commission will hold a public hearing at 11:00 A. M., March 1, 1932, at the California Debris Commission office, 10th Floor, California Fruit Bldg., 4th and J Sts., Sacramento, Calif., to receive protests against granting the application of M. C. Dutton and Fred T. Smith, to mine by the hydraulic process the Bigelow Mine, located near Sierra City Calif., draining into the North Fork of the Yuba Rver, and to store tailings in Bullards Bar Reservoir, about 40 miles below the mine.

Dates of publication February 12, 19 ,and 26, 1932.

W. A. WOOD, JR.
Captain, Corps of Engineers Assistant.

600-TON MILL IS TO BE BUILT ON COLOMA LAND

SAN FANCISCO, Feb. 11—Plans for the early construction of the first unit of a 600-ton daily capacity mill on the property of the Kelsey Mining Company about four and one-half miles northerly from Placerville are being pushed forward by the Kelsey Syndicate, Inc., which was recently organized under the laws of the State of California for the purpose of providing finances for the mill and for extending underground development work and production of ore, officials of the syndicate have announced. The Kelsey mine is on the main "Mother Lode" of California and closely contiguous to Coloma, the site of James W. Marshall's historic discovery of gold at Sutter's mill in 1848.

One of the Kelsey patents is said to be the second mining claim patent granted by the U. S. government in California, and Marshall is said to have located and owned claims immediately adjoining the north endlines of the Kelsey. The Kelsey placer diggings were very rich, one of the nuggets found there having been sold for $4,700.

Officers and directors of the Kelsey Syndicate , Inc., are: F. W. Krecht, chairman of the board; Ralph E. Pearce, president; Max G. Hoberg, vice-president; Sam C. Fletcher, secretary; Egbert T. Willard, treasurer. Offices are in the Hobart building.

Through an exclusive option for more than 200,000 shares of the Kelsey Mining Company stock, the syndicate is in position to control the property, which is said to cover approximately two miles on the main "Mother Lode" vein system, and owned outright by the Kelsey Mining Company.

The property is well adapted to tunnel devolopment to great depth, the outcrop coursing down a steep slope to the south fork of the American River, the part of the "Mother Lode" that was cut out by this deep canyon being regarded as having contributed liberally to the store of placer gold discovered by Marshall a few miles away. The "Mother Lode" belt in this region is mapped by Waldemar Lindgren in the Placerville Folio at approximately two miles wide.

Two adit tunnels have already been driven on the main Kelsey vein, the upper tunnel being 800 feet in length and attaining a vertical depth of 500 feet at the face, and No. 2 tunnel has been driven 1700 feet, with a present vertical depth of about 1000 feet. This tunnel still has about 2000 feet to go on the vein before reaching the Kelsey north endline. A third tunnel can be started on the vein, further down the precipitous hill and at 450 feet greater vertical depth than No. 2, and open more than 1000 feet additional length

CAMPTONVILLE NEWS NOTES

CAMPTONVILLE, Jan. 29—Miss Mildred Bowen of Sacramento spent the week end at her rural home here, returning to the capital city Sunday evening.

Erle Pauly went to the Grant and Heether Mill Tuesday to spend a few days visiting.

Alvin Kennady came down from Sierra City Monday and with Miss Lola M. Labadie motored to Browns Valley, thence to the home of his parents at Oroville on a visit.

Miss Eleanor Turner spent a few days last week visiting her parents at Weeds Point; she attends high school at Nevada City.

Ed Fournier of Sierra City passed through town Wednesday enroute to Sacramento.

Jack Kennady left Tuesday for Oroville to visit with his parents for a while.

G. H. Greene of Grass Valley was in town Tuesday on business.

William A. Lang returned Tuesday from a short business trip to the lower country.

Mr. and Mrs. Fred H. Burtz and family returned a few days ago Mr. and Mrs. Chester Butz and family.

W. H. Cartwright of Grass Valley passed through town Thursday enroute to Downieville.

Miss Helena McGinnis and Miss Helen Hjort of San Francisco arrived Thursday and will remain here for several weeks.

Art King of Yuba City passed through town Tuesday enroute to Downieville.

Albert Hamilton and Harry Deal are prospecting the gravel mine on the Silva Ranch at Oregon Creek.

One of the bunk houses at the Altaview Mine was destroyed by fire Wednesday. The house was used as a dry house and recreational room. It is thought that the fire was caused by spontaneous combustion. The men lost some personal effects No insurance was carried on the building. Dr. Clyde Wayland of San Jose owns the mine while C. N. Chatfield of Pike City is superintendent.

Mr. and Mrs. J. E. Pauly motored to Marysville Friday.

Dr. Clyde Wayland of San Jose was in town Saturday and Sunday.

Acton M. Cleveland has just received a shipment of ten redwood trees from the Santa Cruz mountains which he has planted at his residence.

Henry Schofield and J. M. Jaynes came down from the Altaview Mine Saturday tospend Sunday at home.

FredJoubert motored to Nevada City Wednesday.

A. Frizell, who is mining near Sucker Bar, was in town Wednesday

Ed Lang is recovering from an attack of the lagrippe.

The case of the People vs. Arthur Brockob, of Broderick, was dismissed in the local Justice Counrt Monday, upon proof of defendant having an operators license.

—0—

Many deer were seen a short distance from Nevada City recently having ben driven domn from higher elevations by deep snow and lack of food. Sheriff Carter had hay hauled to the Casci ranch east of town to fed them. Wheat has been fed to the quail also, and hardly wait for the men to depart before alighting to feed.

—0—

Jack Keleher, NID worker, arrived in Grass Valley recently on skis after a 15 mile trip in 10 hours traveling. With snow packed from 11 to 15 feet deep he had difficulty in crossing many ravines and small canyons.

TRI-COUNTY CLUB PAYS TRIBUTE TO MRS. P. B. GOSS

At an executive board meeting of the Tri-County Federation of Women's Clubs held Saturday at the W. I. C. clubhouse in Roseville, plans were formulated for the tri-county convention to be held February 27 at Auburn, the Wednesday Club of Applegate acting as the hostess club. The opening session will be held at the home of Mrs. J. D. Stewart, 138 Commercial street, and is to especially feature history and landmarks.

The morning session will be devoted to routine business and to an address by Mrs. J. W. Beattie, state chairman of history and landmarks. A request has been made that members who have '49 costumes wear them at the luncheon, which is to be served at noon.

The afternoon session is open to the public. Most of the time will be given over to the placing of markers on two ravines near Auburn. The markers will point to a place where gold was discovered by Claude Chana, three months after gold was discovered by John Marshall at Coloma. The markers are the gift of the Citizens Regional Council of Sacramento

Mrs. J. T. Chalstran and Mrs. Robert Jerpe of Roseville will officiate as president and secretary at the all-day session.

At the board meeting last Saturday a fitting tribute was paid to the memory of a beloved member, the late Mrs. P. B. Goss, who was the oldest member of the Tri-County Federation. It was voted to plant a tree in her honor at the Sheridan Clubhouse grounds, the deceased being the donor of the clubhouse to the Sheridan club. Planting the tree will be in line with national tree planting movement. The meeting was adjourned with a pause of silence in her honor, after the following resolutions had been read and adopted:

Whereas, In the death of our beloved friend and co-worker, Mrs. P. B. Goss, not only the Tri-County, but the Federation of Women's Clubs throughout the northern district and the state have suffered an irreparable loss, and

Whereas, The blessed memory of her, so frail in body, but with her indomitable will and courage, her fine mind, her wise counsel, her loving sympathey and her unselfish devotion to the cause she loved, the inspiration of her life can not but help to enrich our lives and make us grateful that we were prvilleged to walk the path of life a little way with her, then be it

Resolved, That the Tri-County Federation of Women's Clubs in this meeting assembled extend to her husband, Mr. Goss, her son, Pierre and his wife, our deepest sympathy and our hope that they may find consolation in the remembrance of the long time she had been spared to them and the loving care and devotion which she lavished upon them. Be it further

Resolved, That a copy of this resolution be spread upon the minutes of this meeting, which was to have been held at the home of Mrs. Goss in Auburn, a copy sent to Mr. Goss and family, and a copy sent to the press chairman of the northern district.

Following adjournment, the members were invited to the home of Mrs. Charltan, president, for an enjoyable tea.

FRENCH CORRAL

FRENCH CORRAL, Feb. 11, (Special to The Nugget)—All of French Corral and San Juan were in town Tuesday, February 9, 1932 on the Munroe-Langley Case .They were: Will C. Clerkin, W. E. Moulton, N. B. Bishop, Clyde Bishop, Mr. Boe, all of French Corral; J. W. Musfield, J. H. Musfield, Mrs. K. Neilson, A. Browning, H. Thomas, all of North San Juan.

Mr. Clyde Browning of French Corral was a visitor in Nevada City Tuesday.

There is a lot of mining going on around the French Corral District this winter, and so far as we can learn, all are making enough for food supplies, or at least a dollar or 75 cents a day.

Well, the kick isn't about the shortage of water this year. There are some mighty poor partners to hook up with in this old world it seems. A couple of these ill mated partners, known personally by the writer, played an alleged sneak game. One is accused of slipping away with result of a week's hard labor, the meager sum of $2.50, leaving the other stranded.

Joe M. Swazey and Homer Musfield, who have a contract to brush the right of way on the Colgate Jower Line, are thinking seriously of buying a motor boat on the time payment and riding to and from work, if this wet weather keeps up.
